BAZE UNIVERSITY, ABUJA DEPARTMENT OF ECONOMICS

Course Description and Week Wise Course Delivery Schedule

Lecturer Name: Paulin Owoh C.

Course Title	Mathematics for Economists II
Course/Module Code	ECO 204
Faculty	Management and Social Sciences
Department	Economics
Level	200
Unit	2
Pre-requisite	Compulsory
Module Overview	This course is designed to give students a broad view of what Mathematics for Economics is all about. The contents are The definite and indefinite integral, Partial derivatives, Differential, Total derivative, Implicit functions, Applications of partial derivatives, Maxima and minima, Lagrange multipliers, Differential and difference equations, Linear algebra, Linear independency. Determinants inverse matrix, Simultaneous linear equations,
Aim	The course 'Mathematics for Economics' aims to give you an understanding of the mathematical techniques that are used in handling economic problems.
WEEK WISE DELIVERY DESCRIPTION	
WEEK-1	Introduction: Overview of course description
WEEK-2	Linear equations Simultaneous Equations
WEEK-3	Rules of Differentiation -Product Rule -Chain Rule Quotient Rule

WEEK-4	Partial Derivatives -Rules of Partial Differentiation
WEEK-5	Applications of Partial Derivatives
WEEK-6	Introduction to Constrained Optimization
WEEK-7	Constrained Optimization using Lagrange Multipliers
WEEK-8	Matrices Determinants, cofactor, minors, transpose. simultaneous equations
WEEK-9	Cramer's Rule
WEEK-10	Constrained optimization using Matrices
WEEK-11	Definite Integrals
WEEK-12	Revision Week
Assessment Methods	Term end Examination: Continuous Assessment:
Recommended Reading List
